MANAGEMENT REPORT OF FUND PERFORMANCE

(Expressed in United States dollars)

Management Discussion of Fund Performance for the period from commencement of operations on March 31, 2021 to December 31, 2021

This Management Report of Fund Performance represents the portfolio management team's view of the significant factors and developments affecting the Fund's performance and outlook for the period from commencement of operations on March 31, 2021 to December 31, 2021. Every effort has been made to ensure the information contained in this Management Report of Fund Performance is accurate and complete, however, the Fund cannot guarantee the accuracy or the completeness of this material. For more information, please refer to the Fund's Prospectus ("Prospectus"). In this report, "Manager", refers to 3iQ Corp., the Manager of the Fund. The "Fund" refers to 3iQ CoinShares Bitcoin ETF. In addition, "net asset value" or "NAV" refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Investment Objective and Strategies

The investment objectives of the Fund are to seek to provide unitholders of the Fund with exposure to the digital asset bitcoin and the daily price movements of the United States dollar price of bitcoin, and the opportunity for long-term capital appreciation. To achieve its investment objectives, the Fund invests in long-term holdings of bitcoin, purchased from reputable bitcoin trading platforms and OTC counterparties, in order to provide investors with a convenient, safer alternative to a direct investment in bitcoin. The Fund does not speculate with regard to short-term changes in bitcoin prices.

Risk

The risks associated with investing in the Fund remain as discussed in the Prospectus. The Fund is suitable for investors looking for long-term capital appreciation of bitcoin and those who have the capacity to absorb a loss on their investment. The NAV of the units will vary according to the value of bitcoin included in the Fund's portfolio. The value of the bitcoin will be influenced by factors which are not within the control of the Fund or the Manager. The Fund was created to invest in bitcoin and is not expected to have exposure to any other investments or assets. Other than cash or cash equivalents, the Fund will invest substantially all of its assets in bitcoin. The NAV per unit may be more volatile than the value of a more broadly diversified portfolio and may fluctuate substantially over short periods of time. This may have a negative impact on the NAV of the units.

For the period ended December 31, 2021, there were no changes affecting the overall level of risk associated with an investment in the Fund. Therefore, the overall level of Fund risk and investor risk tolerance remains as stated in the Prospectus.

Results of Operations

During the period ended December 31, 2021, units of the Fund returned (23.1)%.

The net asset value of the Fund was \$929.2 million as at December 31, 2021. Changes since commencement of operations were composed primarily of net issuance of units of \$1,100.1 million and net loss from operations of (\$170.9) million for the period ended December 31, 2021.
